PROFESSIONAL SUMMARY

Motivated third-year IT undergraduate with a strong interest in software engineering and Full-Stack Development. Proficient in Java, MERN, and modern web technologies, with hands-on experience building scalable web applications. Seeking to apply technical skills and contribute to real-world projects as a Software Engineer Intern.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, C, C++, PHP

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Golang(Go), Spring Boot JSP, Servlets

Databases: MySQL, MongoDB, PostgreSQL

Tools & Technologies: Git, GitHub, Postman, Jira, Figma

EDUCATION

SLIIT - Malabe

Oct 2023 – Present

BSc (Hons) in Information Technology

CGPA: 3.66/4.00

Coursework: Data Structures, Object-Oriented Programming, Database Management Systems, Software Engineering, Programming Applications, and Frameworks, Web Application Development

PROJECT EXPERIENCE

Healthcare Appointment Management System — MERN Stack

 GitHub

- Developed a full-stack healthcare appointment platform using **React**, **Node.js**, **Express**, **MongoDB**, implementing role-based access control for Admin, Doctor, and Patient.
- Integrated secure room-based video consultations using **WebRTC** and **Socket.IO** for real-time doctor-patient communication.
- Designed RESTful APIs with **JWT authentication**, appointment lifecycle management, and an admin dashboard with analytics and approval workflows.

Smart Campus Operations Hub — Spring Boot Web Application (Group Project)

 GitHub

- Developed a full-stack campus operations management platform using **Spring Boot**, **React**, **PostgreSQL**, **Tailwind CSS** with modules for incident ticketing, resource booking, technician management, and admin analytics.
- Led the development of the Incident Ticket Tracking module, implementing a complete ticket lifecycle workflow with role-based access, technician assignment, SLA-based priority handling, and attachment upload features.
- Built admin monitoring and communication features, including ticket status tracking, resolution workflows, comment-based collaboration, and analytics dashboards to improve the efficiency of campus maintenance operations.

MindBridge Mental Health Counseling Platform — (Group Project)

 GitHub

- Developed a full-stack mental health counseling platform using **React**, **Golang (Gin)**, **PostgreSQL**, **JWT Authentication**, **Tailwind CSS**, and **Groq API** with features including counselor onboarding and availability, appointment management, AI chatbot support, event management, treatment plans, progress tracking, and admin analytics dashboards.
- Led the development of the mood-based appointment booking module, implementing AI-driven counselor recommendations, date/time slot selection, and secure appointment scheduling workflows for students and counselors.
- Built waitlist handling, counselor availability management, and appointment status workflows (Pending, Confirmed, Cancelled, Completed) to improve booking efficiency and user experience.

ChronoLux Watch E-Commerce Platform — Next.js & TypeScript

 GitHub

- Built a full-stack e-commerce application using **Next.js, TypeScript, Node.js, Express, MongoDB**, with a scalable product schema that supports variants and discounts.
- Implemented secure checkout with **online payments, COD, refunds**, and complete order lifecycle management.
- Developed responsive UI using **Tailwind CSS** with server-side rendering (SSR) for improved performance and SEO optimization.

Employee Payroll & Leave Management System — Java Web

 GitHub

- Developed payroll automation system using **Java, JSP, Servlets, MySQL** with structured relational database design.
- Implemented salary calculations, leave balance tracking, and automated **PDF payslip generation**.
- Applied role-based authentication and CRUD operations for HR and employee management modules.

Pet Care & Adoption Management System — MERN Stack (Group Project)

 GitHub

- Implemented **Pet Listing and Adoption Management** features with approval workflows, enabling efficient handling of adoption requests by administrators.
- Developed a **Pet Care Service Booking Module** using **React, Node.js, Express, MongoDB, and Tailwind CSS**, supporting appointment scheduling, booking status tracking, and service management.
- Designed and maintained **MongoDB schemas and RESTful APIs** for inventory management, enabling product catalog maintenance and stock tracking.
- Built secure **authentication and user management** functionalities with role-based access control, including user registration, login, and profile management.

SOFT SKILLS

Problem Solving • Analytical Thinking • Team Collaboration • Adaptability • Self-Learning
